LATE FOREIGN NEWS!

Fer P. M. S. S. City of Sydney. Dates to December 29th.

New York, December 28th. The World Prohibition, which promised to leave At-lanta, the most progressive of the South-ern cities, as free from liquor saloons as any town in Maine, has attracted attention the almost phenomenal spread of the temperance movement in the South Georgia, South Carolina, Mississippi, Ala-bama, Florida, and even Kentucky, are moving rapidly in the direction of absolute rohibition. Kentucky, whose very name as come to be synonymous with whisky is only second to Georgia in the movement.
Whole tiers of counties are as painfully temperance as Neal Dow himself could wish. The names of twenty-eight counties are printed in which the Prohibition law rigidly enforced. The sentiment throughtriging emerged. The schamment arrough the triging the triging that the triging the triging that adical, and from being merely for temp-rance has taken a firm stand for prohibi-

MONTREAL, Dec. 26th. The Herold, the ecognized organ of the Canadian actic Company, says a working of pool-ag arrangement has been entered into ng arrangement has been entered into etween the Grand Trunk and the Canaian Pacific. The officers of both roads leny this saying the only agreement is a acit understanding as to uniform rates from the West.

Curcaso, Dec. 26.—Schnefer and Slos-son played the final game in the balk-line silliard tournament to night in the presence of about 300 spectators. In the pools schaefer was the favorite at \$10 to \$7. With the help of generally good playing and two or three magnificent runs, Schae er won the game and earned the title of hampion of the world.

New York, Dec. 26th.—A Hamilton, Ont., special says: A general election in the Dominion has been decided on. It is reported that Sir John Macdonald fears to meet the House, owing to the hostility of the French aroused by the Riel affair nd the knowledge that when Parliament ets, ugly revelations of corruption and sgovernment will be laid bare by a comnittee to be asked for. A convention of Sir John's supporters, to arrange a plat-form on which to go to the country, will be held Tuesday next, and a dissolution will be declared as soon as Sir John re-turns from the other side in January. Much excitement prevails in the province.

London, Dec. 28.—The Duily News pub shed a letter from Antananarivo, the capi tal of Madagascar, giving an account of the French attack upon the Hovas, on Sep tember 10th, outside of Tamatav. that after seven hours of desperate fightin the French were compelled to retire, with the loss of sixty men. Not a single French man succeeded in mounting the earth-works of the Howas. The letter further says that the Hovas gained another victory over the French and their Sakalova allies in the north. The French commander was killed and the enemy fled in confusion leaving forty dead on the field. The Hova army returned to Tamatav where there was great public rejoicing over the defeat of the French. A banque was given in honor of the victorio

Pauls, Dec. 28. Grevy was re-elected President of the French Republic to-day on the joint vote of the Senate and the Chamber of Deputies, acting as the National Assembly. The balloting was carried on amid great excitement. Only five members of the Right cast ballots. Grevy's

total majority was 135. London, Dec. 28th. Clemenceau's re cent speech in the French Chamber of Deputies during the debate on the Ton quin credit, in the course of which he tool occasion to charge Ferry with having ing sought the aid of Bismarck in the set-tlement of the Franco-Chinese difficulty, has caused no little excitement and i dignation throughout Germany. German newspapers are furious at Clemensured terms.

London, Dec. 28th. The Czar is about reinstate Prince Alexander of Bulgaria in his former rank in the Russian army The presence of Prince Voickoff and other Russian officers at Sofia creates a belief in a close alliance between Russia and Bulgaria, and these facts have caused alarm among the friends of Turkey. I is believed that the compact between th Czar and the Prince Alexander, by which Russia, recognized the Bulgarian union is the prelude to a Russian campaign in the Spring and the final dismemberment of the Turkish Empire.

Bentix, Dec. 26th. Parts, Dec. 26th. In the Senate to-day the Tonquin and Madagascar credits were adopted by 225 to 61. The report that Admiral Galibert, Minister of Marine and Colonies, had resigned is confirmed.

Paris, Dec. 25th.— La Matia this morning prints, though without giving full credit to the report, a telegram from Lis-bon, announcing that a German man of war has been despatched from the island of St. Thomas, in the Gulf of Guinea, for Balengo, in consequence of a conflict be-tween a party of French sailors and the crew of the German corvette Cyclops.

The Hanging Gardens of Babylon. The hanging gardens of Babylon were built by Nebuchadnezzar to gratify his wife Amytis. The gardens were over 400 feet square, built terrace above terrace until they were twenty-seven feet higher than the walls, or 400 feet. The top wa stained by a series of arches one above the other, and each terrace was bound by a solid wall twenty-two feet thick. On the top arches were first laid flat stones, sixteen feet by four feet; over these weeds and bitumen; then two rows of cemented brick covered by sheet-lead, upon which was laid earth sufficiently thick to nouris large trees. The gardens were filled with the blooming plants and shrabs which were admired by Queen Amytis in her native Media. The different terraces and groves contained fountains, parterres, seats, and banqueting rooms; in fact, all the splendor and magnificence of Eastern art seem to have been lavished upon these gardens by King Nebuchadnezzar in or-der that his Median bride should be happy

The Value of Small Invention

The following is from the circular of Lancaster of New York, the well known Patent Law Attorney: "Inventors and those who invest in patents may be reminded that the most profitable inven-tions are those of small pretentions. As inventor need not be either a Bessemer, Pullman, Westinghouse, or an Edison to make a fortune. The New York Times enumerates a number of patents on small ngs, producing great results, which may be mentioned the "Stylogra-phic Pen," now yielding an income of £20,000 a year to the proprietors. An other pen for shading in different colours produces £20,000 per annum; rubber stamps the same. The inventor of the stamps the same. The inventor of the gummed newspaper wrapper is a rich man. The rubber tip at the end of the lead pencil affords the owner of the roy alty an independant fortune (over £20,000 a year.) The "Drive Well" was an idea of Colonel Green, whose troops during the war were in want of water. He conceived the idea of driving a 2 inch tube into the ground until water was reached and then attaching a pump. This simple contrivance was patented after the war, and tens of thousands of farmers who have adopted it have been obliged to pay him a royalty, a moderate estimate of which is placed at £600,000. The spring window shade yields an income £20,000 a year, and a large fortune has been reaped by a miner who, 10 years since, invented a metal rivet or eyelet at each end of the mouth of coat and pants pockets, to resist the strain caused by the carriage of pieces of ore and heavy tools. The inventor of the roller skate made over £500,000 by his invention. The gimlet pointed screw has evolved more wealth than most silver nines, and the man who first thought puting copper tips to childrens' shoes is as well off as if his father had left him 740,000 in United States bonds. Upwards of £2000 a year is made by the of a common needle threader. A favorite toy—the "return ball"—a wooden ball with an elastic attached, yields to the patentee an income of no less than \$5,000 per annum. And a very handsome com-petence indeed is derived by the inventor of the "dancing Jim Crow." To the fore-going might be added thousands of pat-ents of small but useful articles from which

preparing an important scheme of local government for the whole kingdom.

Gladstone and bis collegement is distributed and bis collegement in the scheme of local which large sums have been paid. Few inventions pay better them which large sums have been pad. The inventions pay better than popular pat ented toys. The sale of a little wooden figure, "John Gilpin," has been incredibly large for many years; and a very ingenious toy, known as "The Wheel of Life," is said to have very speedily yield all woods and the sale of the page of the sale Life," is said to have very speedily yield ed upwards of £100,000 profit to its in-ventor. Perhaps the most successful of modern toys has been the "Chameleon Top." This novelty has long been a favourite, and has sold at prices varying from 2s. 6d. to 10s. each. The sale has been enormous, and the profit; are esti-mated to have been greater than those of one of the most valuable and important inventions of modern times. The Musical and Choral top is another instance of the and Choral top is another instance of the enormous sale of small inventions, one firm alone in London having in the three years, passed three millions through their hands. It is still selling largely all ove the world.—Mackay Standard.
